No

Presentation Details

The realignment of a Municipal Drain in 2 locations (north reach and east reach) are not dealt with in the same manner. The north reach realignment has a high potential to harm a wetland and Species at Risk, and this harm can be reduced or eliminated if it is conducted the same as proposed for the east reach realignment. The committee is requested to require that the north reach realignment be conducted the same as the east reach realignment, being a temporary realignment, and not be conducted until immediately before the quarrying will proceed beyond the drain.

Video Consent

Yes
