## **MEMORANDUM**

**TSC-C 5-2019**

**Subject: Bicycle Metrics on Regional Roads**

**Date: Tuesday, May 14, 2019**

**To: Transportation Steering Committee**

**From: Carolyn Ryall, Director, Transportation Services**

---

The Metrics (Performance Indicator PI) is part of the Niagara Region Transportation Master Plan. Refer to exhibit 8.3: Performance indicator: Improve options for sustainable mode.

Niagara Region developed Cyclist PI as part of the base lines of active transportation efforts, to ensure balance between modes, minimize the need of infrastructure and reduce greenhouse gas emissions.

The following efforts are in place to date:

- Identify locations of proposed cycling facilities and coordinate with Public Health to proceed with cycling counts at the area under the shortlist.
- Produce the Niagara Annual Safety Report for 2017, statistics will include the number of collisions by vehicle type, person involved as well as pedestrian and/or cyclist involvement to determine if the road is safe for cyclists.
- Niagara Region is moving forward with vision zero, to ensure all users are safe and modify driver behavior if required.
- Niagara Region will implement community safety zones. Part of the implementation measures is to identify the number of cyclists commuting to schools.

Respectfully submitted and signed by
