No

Presentation Details

Banning Automated Speed Enforcement (ASE) Cameras Vision Zero - Is a good program that derives its benefits from road reconstruction and education. The goal is to reduce collisions, injuries and fatalities. ASE Cameras are problematic and should be banned for these three reasons. 1) They are not placed in areas where the reduce collisions, injuries and fatalities. They are placed where fines are doubled. 2) They use unfair trials to indiscriminately target vehicle owners and not drivers. 3) They violate charter rights and have dubious justice system practices which brings the administration of justice into disrepute.
