A balanced operating budget, developed for the purposes of setting tax rates and user fees, was approved by Council on February 28, 2019. The operating surplus presented at the top of the chart represents the actual financial results of the Region compared to the operating budget. Since the Region is required to report its annual surplus using Public Sector Accounting standards (PSAS), a number of adjustments are required in order for the financial results to conform with PSAS. For example, in the operating budget capital projects are recognized when funding is allocated, however in order to conform with PSAS an adjustment is required as capital projects should be expensed over time through amortization, rather than immediately.
