# Update on Transition of the Residential Blue Box Program to Full Producer Responsibility

Public Works Committee June 16, 2020

## Background

- Ontario is shifting to a Full Producer Responsibility Model for the residential Blue Box Program
- Timelines specific to new Blue Box Regulation:
  - 2019 2020 Draft Regulations (Current phase)
  - 2021 Approval of Regulations
  - 2021 2022 Stakeholders organize and prepare for Producer Responsibility
  - 2023 2025 Producers take full responsibility from communities
- Concurrent Wind-up for Existing Blue Box Program:
  - 2020 Stewardship Ontario develops plan for transition and submits to RPRA (Current phase)
  - 2020 RPRA approves plan by Dec 31
  - 2021 2025 SO implements plan and each community continues to be funded until transition to EPR complete, with all communities complete by the end of 2025

## Regulations

MECP will address the following in the new Blue Box regulation:

- 1. Definition and scope of designated materials;
- 2. Collection and accessibility requirements;
- 3. Management requirements that producers must meet; and
- Transition approach criteria to select which communities will transition from the current Blue Box program to the EPR framework under the RRCEA in each of 2023-2025.

### AMO Request

AMO has requested a Council resolution, passed by June 30, 2020, directed to AMO and MECP that specifies:

- Council's preferred date to transition based on exiting service provision (between January 1, 2023 and December 31, 2025);
- 2. Rationale for transition date;
- 3. Whether Council is interested in potentially continuing to provide services (e.g. contract management, collection, haulage processing services etc.) or not; and,
- 4. Key contacts if there are any follow-up questions.

# Recommendations

# 1. Proposed Transition Date January 1, 2023

- Recommendation for this early date is based on anticipated cost savings for residents, compared to current process under which Niagara Region is responsible for 50% of net costs
- It is estimated that taxpayers will unnecessarily incur an annual expense of approximately \$8,175,000 for each year Niagara Region does not transition
- Curbside Collection and Haulage contracts include option for early removal of residential Blue Box collection (compensation for contractors is based on a formula)

## 2. Niagara Region's Role

#### **Provision of Processing Services on Behalf of Producers**

Primary factor influencing decision to bid on processing services:
Timing and outcome of the MRF opportunity review

#### Provision of Collection and Haulage Services on Behalf of Producers

- Niagara Region will bid on collection and haulage services if commercially acceptable terms are available
- Primary factors influencing final decision to bid on collection and haulage services:

-Full payment by producers

-Reasonable and quantitative measures for standards and requirements related to collection and haulage

### 2. Niagara Region's Role Cont'd

#### **Servicing Additional Property Types**

- Continued provision of service to IC&I properties, select Multi-Residential properties and public spaces depends primarily on cost
- If Niagara Region continues to provide residential Blue Box collection, the IC&I properties will be part of the integrated collection system – otherwise producers must agree to provide the service
- Separate regulations related to IC&I properties will also impact how this service is provided longer-term
- The residential Blue Box regulation is expected to include Multi-Residential properties, but the full scope of properties encompassed, and timing for commencement, will be determined by the regulation

### 2. Niagara Region's Role Cont'd

#### Service for Non-Obligated Materials

- Niagara Region would be solely responsible for costs related to collection, haulage and processing of materials not defined in the regulation
- Removal of currently accepted materials may generate confusion for residents but it may be difficult to find a processor for non-obligated material

#### Service at Depots

- Potential costs related to depot reconfiguration requirements
- Residential convenience maintained
- May help reduce illegal dumping

## 3. Final Considerations

#### Regulations

-Not yet finalized

-Niagara Region will continue to advocate for regulations that support bestpractices

- During transition (January 1, 2023 December 31, 2025) producers are obligated to maintain existing service levels in Niagara Region
- Post-transition (i.e. starting January 1, 2026) Niagara Region will have no operational program control over:
  - -Collection frequency
  - -Container type
  - -Implementation of single versus dual stream
- Mitigating risks

**Questions?**
